4. **Submit the Action**
   Click **Submit** to save the UI Policy Action. The action is now linked to the High Impact Control UI Policy and will automatically apply to the Urgency field when an Incident has High Impact.

5. **Optional Verification**
   To test the action:

   - Open an Incident record.
   - Set the **Impact** field to **High**.
   - Check that the **Urgency** field becomes read-only.
   - Change Impact to a different value to confirm that the field reverts back if needed.

Task 3: Create onChange Client Script

Activity 1: Create Client Script

1. **Navigate to Client Scripts:**
   Go to System UI → Client Scripts.

2. **Click New** to create a new Client Script.

3. **Fill in the details:**

- **Name:** Auto set urgency for high impact – clearly shows the purpose.
- **Table:** Incident – the script runs only on Incident records.
- **Type:** onChange – executes when a field value changes.
- **Field name:** Impact – triggers the script when Impact is updated.
- **Active:** true – ensures the script runs immediately.

4. **Paste the script** in the script editor section.
5. **Click Submit** to save the Client Script.
6. **Verify:** Open an Incident record and change the Impact field to **High**. The Urgency field should update automatically

Script:

```
function onChange(control, oldValue, newValue, isLoading) {
    if (isLoading || newValue == '') {
        return;
    }

    if (newValue == '1') {
        g_form.setValue('urgency', '1');
        g_form.addInfoMessage('Urgency set to High for High impact incident.');
    }
}
```

5. Click **Submit**.
