1. **Navigate to Incident:**
   Go to Incident → Create New to open a new Incident form.

2. **Set the Impact Field:**
   Select **High** for the **Impact** field. This will trigger the UI Policy and Client Script behaviors you configured earlier.

3. **Leave Assigned To Empty:**
   Do not fill in the **Assigned To** field. This will test the onSubmit Client Script that prevents saving if Assigned To is missing.

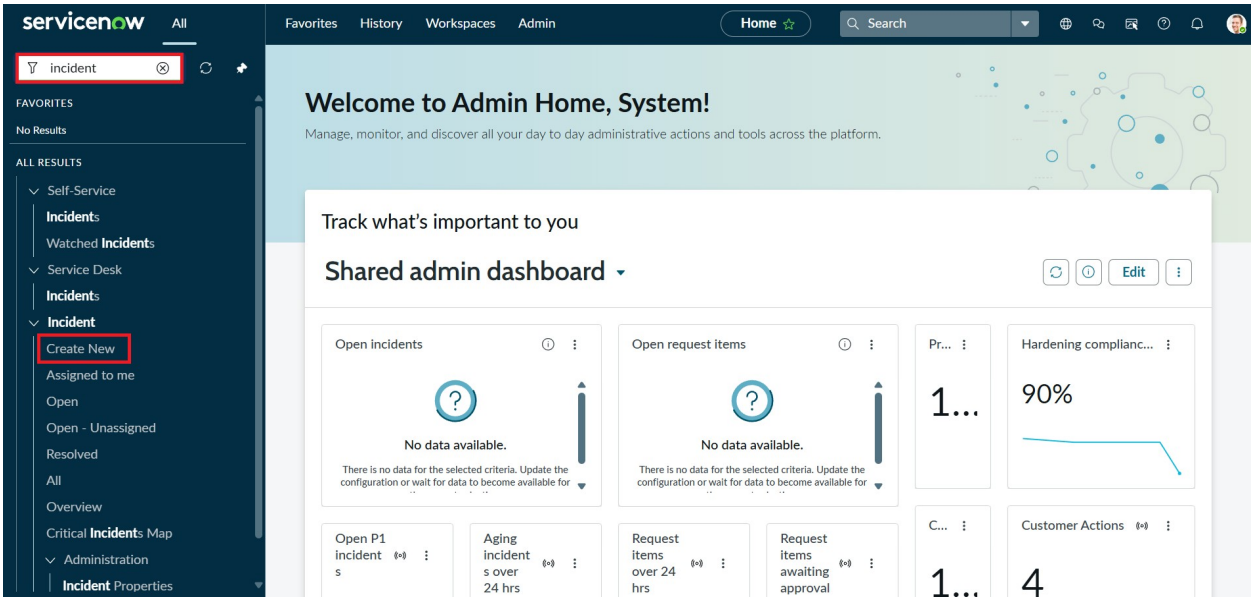

4. **Click Submit:**
   Attempt to save the Incident record.

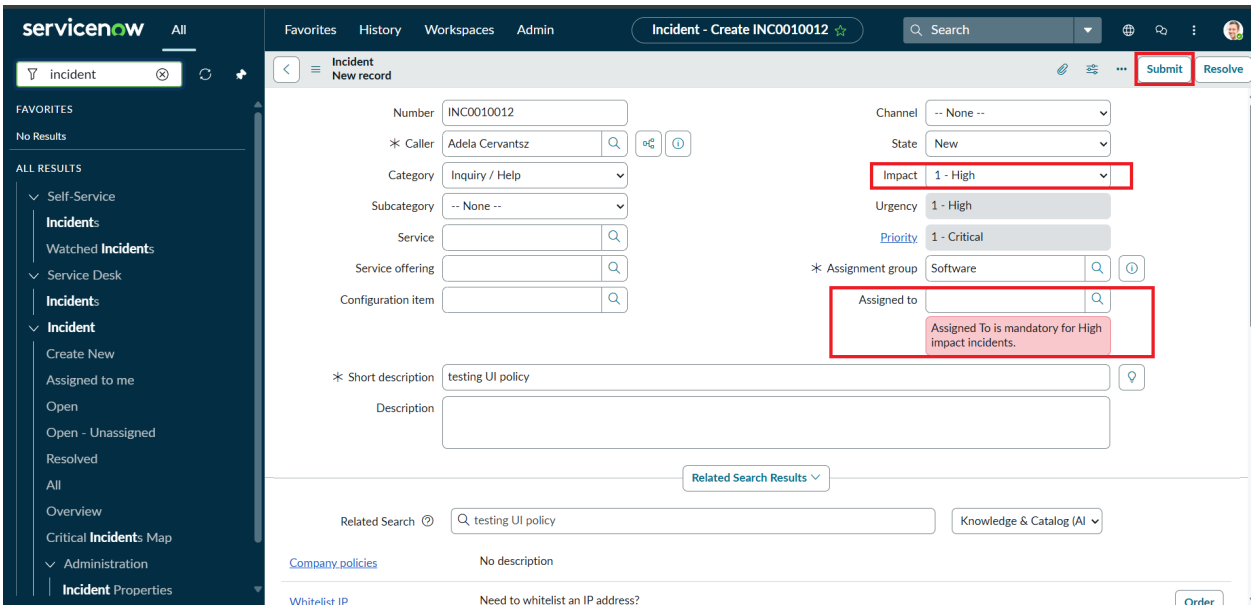

5. **Verify the Result:**

   - The Incident should **not be saved** because Assigned To is required when Impact is High.

   - An **error message** should appear, indicating that the Assigned To field cannot be empty.

   - Confirm that all UI Policy actions, such as read-only fields or automated urgency updates, are working as expected.

Activity 2: Test Successful Save

1. **Fill the Assigned To Field:**
   Open the Incident form and select a user in the **Assigned To** field. This ensures the onSubmit Client Script condition is satisfied.

2. **Click Submit:**
   Attempt to save the Incident record.

3. **Verify the Result:**

   - The Incident should be **saved successfully** without any errors.

   - Confirm that all other configured behaviors, such as:

     - **Urgency auto-setting** (from the onChange Client Script)

     - **Read-only fields** (from the UI Policy Action)

     - **State restrictions** (from the onCellEdit Client Script)
       are functioning as expected
